Product Description

Besta is a PPR Four Ways Shower Mixer manufacture and supplier in China, we have more than 10years experience in water pipe system and we have more than 200sets moulds to produce full range ppr pipe fittings,ball valves, and some other pipe fittings. We have our own mould factory, design products and make OEM products for customer. Besta brand PPR fitting adopts imported raw material RA140E or R200P, and well sell in Africa, Middle east ,South America, Asia etc market. Our product surface is perfect, quality is high, price is reasonable. if you want to buy PPR Four Ways Shower Mixer product from China, we hope our product will be your best choice.

The shower mixer valve on the market is mainly made of copper, but the copper connection is threaded connection, which has certain potential safety hazards. There is a risk of water leakage after being concealed in the wall for a long time. To avoid this risk, we have developed PPR shower mixing valve, which solves the risk of water leakage through welding connection.

So far, we have developed PPR three-way mixing valve, PPR four-way mixing valve, PPR five way mixing valve, and PPR six way mixing valve, They have successfully applied for patents. At present, these products are mainly for export. Customers are very interested in these products and have been recognized by the market through trial orders. Now, the products have been sold to South America, the Middle East and Africa.
